MidBox™ Electrical Enclosure

The **MidBox** is a “NEMA 3R” enclosure for dry or rainy locations. It features code gauge steel and high build quality. Listed to the UL 1124 safety standard, the **MidBox** is ready for installation of AC or DC circuit breakers (including QOU's to 100 amps*), meters, etc.

Top Features, Top Value

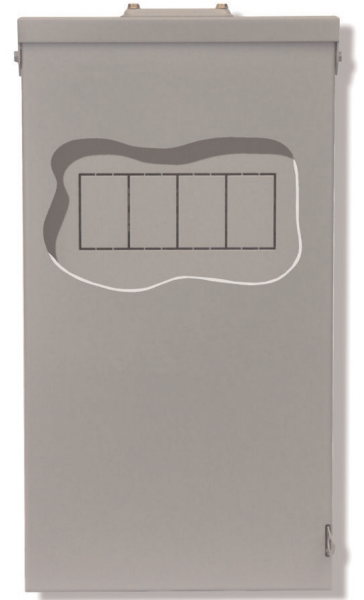

Although it's priced about the same as run of the mill “solar array combiner boxes”, the **MidBox** stands apart for these reasons:

- (1) the **MidBox** is 17.5” x 9.75” x 3.5”—compare that to the competition.
- (2) **MidBox** circuit breakers can be operated without tools **or** shock/spark hazards, thanks to a deadfront panel and swing up access door.
- (3) the **MidBox** is more than just a great PV combiner. It also makes a superior AC inverter bypass switch, as just one example.

\$159 Plus Options

Installer Friendly

Two (1/0 capable) insulated terminal blocks are pre-installed. The biggest knockout is 1.5” (punchable to 2”). Padlock the door if you like, or add a weatherhead for rainproof wire entry from the top.

Highly Adaptable

Within limits, the following options will fit the **MidBox**:
A, C, D, G, H, J, K, L, M, P, T, U, V, W, X, Y.
Refer to the **Options** pages for more information.

(Code: o)

*If you need 175/250 amp DC breakers **in a rainproof box**, ask about the **MegaBox™ 3R**—just one of the additional enclosures available by special order. Sometimes a special order item will fit better or cost less for your particular application, so...

Be sure to discuss any power project with your authorized **Can-Do Dealer**.

All published prices are “Reference Retail” only. Installation and setup not included.
Actual purchase prices are individually negotiated between end users and their retail dealer.
Please respect this manufacturer: Do not reverse engineer or otherwise copy these products.

MaxBox™ Electrical Enclosure

The **MaxBox** is a “NEMA 3R” enclosure for dry or rainy locations. It features code gauge steel and high build quality. Listed to the UL 1124 safety standard, the **MaxBox** is ready for installation of AC or DC circuit breakers (including QOU breakers), meters, etc.

Groundbreaking Features

As big brother to the popular **MidBox™**, the **MaxBox** offers:

- (1) a swing up access cover which can be padlocked for security;
- (2) a deadfront panel to protect operators from sparks and shocks;
- (3) weatherhead provision, for rainproof wire entry from the top.

\$229 Plus Options

Installer Friendly

The **MaxBox** is a generous 21.5” x 14.5” x 4.75”. Even with several circuit breakers installed, there's often room inside for AC or DC timers, controllers, etc. AC or DC breakers are available up to 100 amps*.

Two insulated terminal blocks are preinstalled (maximum cable size: 250 MCM). Big knockouts are also standard (up to 2.5” nominal). Take system design to the max with the **MaxBox**.

Highly Adaptable

Within limits, the following options are **MaxBox** compatible:
A, C, D, G, H, J, K, L, M, P, Q, S, T, U, V, W, X, Y.
Refer to the **Options** pages for more information.
